

FOR IMMEDIATE RELEASE

AQUENT SELECTS RESUME MIRROR TECHNOLOGY TO IMPROVE CUSTOMER SERVICE

Vancouver B.C., — August 27, 2003 — Talent Technology Corporation, the award-winning provider of HireDesk, recruitment technology solutions, today announced that Aquent, a professional services firm specializing in IT and creative staffing solutions, has chosen Resume Mirror to provide key recruiting technology. Aquent has selected Resume Mirror's REX extraction component software to streamline resume processing for improved customer service. Among the reasons Aquent chose Resume Mirror were the fast, highly accurate resume data extraction, scalability to manage high resume volume requirements and capabilities to handle resumes in multiple file formats.

With 70 locations in 14 countries, Aquent is known as a staffing industry leader. When it was time to upgrade the custom recruiting application Aquent had built they sought a partner who specialized in recruiting technology. "With Resume Mirror we were able to access deep recruiting technology expertise and quickly enhance the resume management functionality of our custom-built application. Upgrading our recruiting application with innovative technology has increased operational efficiencies and helped us deliver staffing solutions to our clients faster. The technology has also helped us streamline our talent application process," stated Larry Bolick, CIO of Aquent.

As project lead in the implementation, Dan Perez, Director of Research & Development at Aquent, stated, "As a provider of outsourced solutions, we value the specialized expertise a third-party vendor can provide. The implementation was fast and the stability and scalability of Resume Mirror's technology are impressive. We quickly converted over 100,000 resumes during our implementation and the product delivered consistent processing performance."

"It's good to see the immediate business benefits our resume extraction technology can provide for a company like Aquent. Because our products are easy to integrate with existing applications and provide the technical depth to solve the many complex problems of resume processing, they address the challenges that many staffing companies face," stated Praj Patel, General Manager of Resume Mirror.
