

FOR IMMEDIATE RELEASE

## RESUME MIRROR ANNOUNCES CONTRACT WITH MCKESSON

PeopleSoft® e-Recruit user to improve resume processing  
with Resume Mirror Extraction Enterprise

**Vancouver B.C., — September 19, 2005** — Talent Technology Corporation, the award-winning provider of leading-edge recruiting solutions and technology components, today announced a contract with McKesson Corporation. McKesson, currently ranked 15 on the Fortune 500, is a healthcare services and information technology company dedicated to helping its customers deliver high-quality healthcare. McKesson is implementing Resume Mirror Extraction Enterprise to accelerate and simplify the processing of resumes into their PeopleSoft e-Recruit system.

Resume Mirror Extraction Enterprise is a focused application developed specifically to work with existing ERP and ATS systems. It improves the online application experience for job seekers, improves response management with candidates, reduces recruiter workloads and cuts outsourced hardcopy resume and application processing costs. Resume Mirror Extraction Enterprise also includes a resume processing plug-in for Microsoft® Outlook® which allows resumes received via email to be instantly parsed and the data automatically entered into the customer's candidate management system. Resume Mirror Extraction Enterprise has undergone extensive industry testing, is widely deployed, and is a PeopleSoft certified software module.

"McKesson believes in utilizing the most advanced technology to help attract and secure the best possible candidates," said Susan Slater, Director of Talent Acquisition for McKesson. "Resume Mirror Extraction Enterprise works to improve and streamline both the applicant's and the recruiter's experience whether the resumes are submitted via traditional methods, a job board, email or our corporate website. Our recruiters are excited about the Microsoft Outlook plug-in module which will improve the speed and ability to input candidate data into our PeopleSoft database."

"It was important for McKesson to implement a solid resume processing technology as part of the implementation of our PeopleSoft e-Recruit module," said Charlie Fusco, Corporate Systems Product Manager. "The Resume Mirror Extraction Enterprise product provides everything we are looking for in a resume processing solution and also offers some innovative new capabilities such as the plug-in for Microsoft Outlook. Resume Mirror solutions have been designed for easy implementation and are PeopleSoft certified which were two critical requirements for us."

"McKesson is constantly looking for new ways to hone their competitive edge in recruiting talent to their organization," said Praj Patel, Executive Vice President, for Talent Technology. "Resume Mirror's technology helps McKesson leverage their PeopleSoft investment with tools that enhance their recruiting process and support increased recruiter productivity and improved candidate satisfaction. We are looking forward to working with McKesson to further enhance their recruiting processes through the capabilities of Resume Mirror Extraction Enterprise."

## **About McKesson**

*McKesson Corporation (NYSE:MCK), currently ranked 15 on the Fortune 500, is a healthcare services and information technology company dedicated to helping its customers deliver high-quality healthcare by reducing costs, streamlining processes and improving the quality and safety of patient care.
