

Baystate Recruiters More Productive with Talemetry

Baystate Health, the parent of three hospitals, 80 ambulatory sites, and more than 10,000 employees in Massachusetts, needed a way to reduce candidate “drop off” during the application process. Talemetry integrates with Baystate’s PeopleSoft platform, improves the application experience, and helps ensure a complete and accurate candidate profile. Recruiters have a dependable pipeline of quality applicant data.

“Talemetry has improved recruiting productivity at Baystate Health by leaps and bounds.”

ENGAGE

Challenge

Improve the job applicant experience, and enable recruiting staff to be more productive by providing access to an accurate database of candidates.

Solution

Job applicants are able to upload their resumes in a wide variety of electronic formats, and Talemetry parses applicant data with precision for a more accurate, complete database.

Results

Baystate Health recruiters have a dependable pipeline of candidates, and now make educated hiring decisions based on the best, most complete applicant information.
